

Trajectories

Every project developed by SoftDucts is custom designed and fabricated to meet the necessities and requirements in accordance with the type of industry, hygrothermic conditions, geometries and HVAC systems.

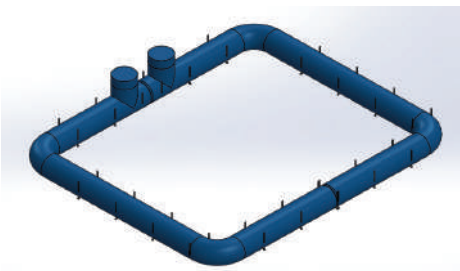

Always in search of the desired comfort, backed up by an engineering analysis.

One air inlet .

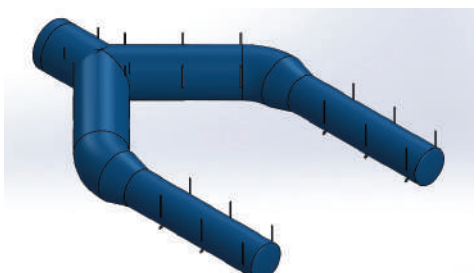

Grafts and 90° elbows.

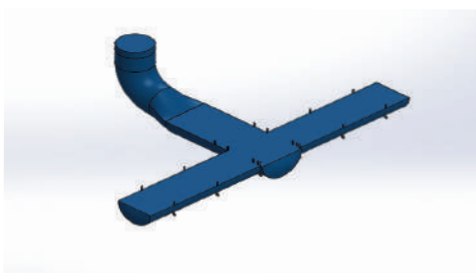

Square trajectory with two air inlets.

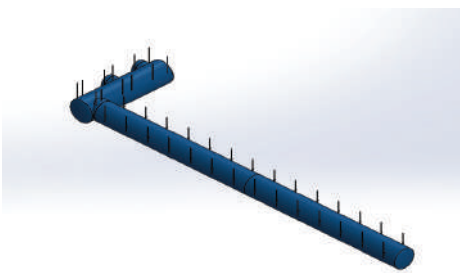

Two air inlets with 90° and 45° elbows.

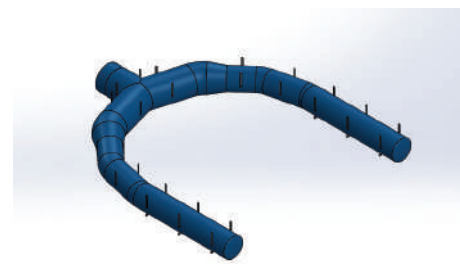

"Y" with one air inlet.

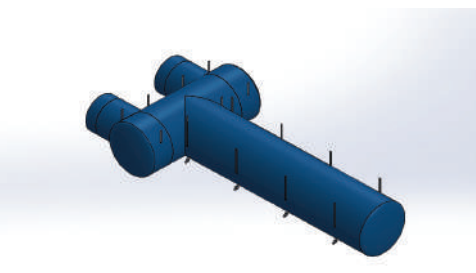

"T" half round with one air inlet.

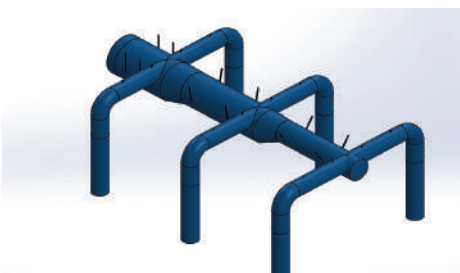

"L" with graft and two air inlets.

"U" with reductions.

Two air inlets and a graft.

Main duct, with two reductions, six grafts and 90° elbows.
