## SoftDucts, LLC. AIR FLOW

The twin duct is an alternative to the oval duct. The system consists of two independent circular and parallel ducts that allows the height to be reduced.
The following table of content demonstrates the proportional sizing:

| Diameter |  |  |  | W | x |  | H |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 12 | inches | $=$ | 18 | inches | X | 9 | inches |
| 18 | inches | $=$ | 25 | inches | X | 12 | inches |
| 20 | inches | = | 29 | inches | X | 14 | inches |
| 24 | inches | $=$ | 34 | inches | X | 17 | inches |
| 30 | inches | $=$ | 39 | inches | X | 21 | inches |
| 36 | inches | $=$ | 51 | inches | X | 25 | inches |
| 42 | inches | $=$ | 59 | inches | X | 30 | inches |
| 48 | inches | $=$ | 67 | inches | X | 34 | inches |
| 54 | inches | $=$ | 76 | inches | X | 38 | inches |
